WHAT WE DO

Capital, access, and execution, *as principals.*

01

Primaries & Secondaries

Direct primary investments alongside founders and institutions, and liquidity solutions across private markets: LP interests, directs, and structured secondaries. We work from a defined mandate, principal to principal, and respect the consent and transfer mechanics each position carries.

02

Growth Equity

Scaling companies in frontier industries, pairing capital with market access, government-level networks, and cross-border execution across the US, Europe, and Asia-Pacific.

03

Energy & Commodities

Physical and financial exposure across energy and commodity markets. We deal with verified principals only: no chains, no circulated offers. Counterparties are established under NCNDA before names are exchanged.

LEADERSHIP

Thomas Tougaard, M.Eng., MBA, Founder & Managing Partner. Directs investment strategy for corporations, governments, venture and growth-equity funds, and multi-billion-dollar family offices, with a focus on cross-border transactions where capital, technology, and policy intersect. Previously Investment Manager and Energy Advisor at the Ministry of Foreign Affairs of Denmark. Boards: World Chamber of Commerce, Texas; Swedish Chamber of Commerce, Texas.

CONVENING

Founder of the **Global CleanTech Forum**, convened at Palace Schatzalp above Davos during the week of the World Economic Forum's 56th Annual Meeting: a fully curated week for a delegation of fifteen technology companies, culminating in the Investor Gala & Awards Ceremony. Convening is how we source, diligence, and build conviction. The 2027 delegation is open for application.
